

CME QUESTIONS / STE SORULARI

- 1- Which parameters of the below had been measured in the study of Yılmaz *et al.*
- Pelvic incidence
 - Lumbar lordosis
 - Thoracic kyphosis
 - T-1 slope angle
 - None of above
- 2- How many normal healthy patients had been evaluated in the study of Yılmaz *et al.*
- 10
 - 20
 - 30
 - 40
 - 50
- 3- Which sentence of the below is true according to the second study of Yılmaz *et al.*
- C0 inclination angles has been increased.
 - CO-C2 angle has been decreased.
 - T1 slope angle has been decreased.
 - Cervical lordosis has been unchanged.
 - Degenerative disc disease effect sagittal plane parameters of the subaxial region
- 4- How many patients with the degenerative disc disease was evaluated in the second study of Yılmaz *et al.*
- 30
 - 40
 - 50
 - 60
 - 70
- 5- Which parameters below had been changed with the statistically significance according to the study of Er *et al.*
- C0 inclination angle
 - CO-C2 angle
 - C7-T1 local sagittal contour
 - T1 slope angle
 - Cervical lordosis
- 6- How many male patients had been evaluated in the study of Er *et al.*
- 14
 - 24
 - 34
 - 44
 - 54
- 7- How many complex operation had been performed according to the study of Gerilmez *et al.*
- 17
 - 37
 - 37
 - 47
 - 57
- 8- Which sentence below was true according to the study of Gerilmez *et al.*
- It has been observed that surgical instruments may not be contaminated with airborne particles.
 - Great attention must be given to appropriate behavior regarding contamination in the operating room,
 - Activity must be kept to a minimum,
 - Doors must be controlled.
 - All of the sentence above
- 9- How many cases had been evaluated for the sexual function in the study of Onen *et al.*
- 50
 - 40
 - 30
 - 20
 - 10
- 10- Which percentages of the patients with the sexual disfunction due to herniation of cervical disc below has been calculated in the study of Onen *et al.*
- 17.2 %
 - 34.5 %
 - 58.6 %
 - 65.6 %
 - 78.1 %
