

- 1- In the study by Güçlü et al., which of the following is the vertebra for which a trauma model was constructed using the finite element method?
- C1
 - C2
 - C3
 - C4
 - C5
- 2- Which of the following is incorrect according to the data obtained in the study by Oltulu et al.?
- 30 patients were included in the study.
 - Two evaluators worked on the study.
 - A similar correlation was found between the manual measurement values and the computerized measurement values.
 - Sagittal parameter measurement with a computer was found to be more reliable than manual measurement.
 - A high consistency was found in the computerized measurements.
- 3- At which of the levels were the disc heights measured in the study by Köken et al.?
- C1-2, C2-3, and C3-4
 - C3-4, T1-2, and L1-2
 - T11-12, T12-L1, and L1-2
 - C4-5, C5-6, and C6-7
 - L1-2, L2-3, and L4-5
- 4- What was the main benefit of the measurement of the disc heights in the study by Köken et al.?
- Predetermination of disc degeneration
 - Evaluation of growth potential
 - Accurate determination of the movement borders
 - Application of the correct size of intravertebral cage and prosthesis
 - Determination of the severity of spinal stenosis
- 5- For how many patients was the atlantodental distance measured in the study by Özdoğan et al.?
- 48
 - 60
 - 74
 - 88
 - 100
- 6- When the atlantodental distance is over which of the following values can pathological dissociation be considered, according to the results obtained in the study by Özdoğan et al.?
- 10
 - 8
 - 6
 - 4
 - 2

7- Which of the following lengths should be preferred for transpedicular screws used in the thoracolumbar region in females, according to the study by Köken et al.?

- a) 2–7 mm
- b) 3–8 mm
- c) 5–8 mm
- d) 4–12 mm
- e) 6–11 mm

8- How many patients received percutaneous endoscopic lumbar discectomy in the case report by Uğraş et al.?

- a) 13
- b) 23
- c) 33
- d) 43
- e) 53

9- According to data obtained in the study by Uğraş et al., what percentage of patients recovered fully?

- a) 40
- b) 60
- c) 70
- d) 80
- e) 100

10- At which vertebral levels were hemangiomas detected in the case report by Korkmaz et al.?

- a) T4 and L4
- b) T1 and L1
- c) T6 and L2
- d) T10 and L4
- e) T12 and L2
